Write a query to list all products where the discount amount exceeds \$50. The discount amount is calculated as $\text{original_price} * \text{discount_percentage}$. Return `product_id`, `original_price`, `discount_percentage`, and `discount_amount`.

Sample table: Products

`product_id` | `original_price` | `discount_percentage`

"101" "50" "0.1"

"102" "150" "0.15"

"103" "200" "0.2"

"104" "300" "0.25"

For example:

Result			
<code>product_id</code>	<code>original_price</code>	<code>discount_percentage</code>	<code>discount_amount</code>
-----	-----	-----	-----
104	300.0	0.25	75.0

Answer: (penalty regime: 0 %)
